ANALYST REVIEW – USPTO REPORT

Search Information

Type of Search: **Tailored Services**
 Mark: **SAMPLE INDUSTRIES**
 Goods/Services: **BUSINESS CONSULTING SERVICES**

Data Information

This search report includes information from the USPTO Official Gazette published on **01/11/2011** and pending applications filed through **01/10/2011**. The pending applications are received from the U.S. Patent and Trademark Office and are updated to our database as they are made available.

Our database includes active USPTO text records dating from **1884** to present.

All queries in the Search Strategy below have been applied to all active applications and registrations in our database, as well as inactive USPTO applications and registrations from 01/01/2006 to the present. Inactive USPTO applications and registrations from 01/01/1984 – 01/01/2006 were searched for identical trademarks.

In-Use Information

In-Use citations provide information about whether and how potentially conflicting trademarks are being used on the Web. We provide information, when available, on the Citation, Owner and its use in commerce for up to:

- 5 USPTO citations
- 2 State citations
- 4 Common Law Citations (2 Common Law Database citations, 2 Business Name citations)

We provide up to three links and one Web Page Lookup, when available:

- In-Use link
- Citation link
- Owner link

The search results included in this section are a selection of the information available at the time of the preparation of this search report, and are not a comprehensive representation of the Web. Any of the Web links included in your search report may become unavailable at any time following the preparations of this report.

Last Reported Owner

“Last Reported Owner” is our best determination of the owner of a trademark, based on a programmatic analysis of USPTO trademark records and any assignment transactions associated with the trademark. In determining “Last Reported Owner”, we exclude recorded documents representing security interests, liens and other transactions which ordinarily do not result in a change of ownership.

Earliest Date in Record

The Earliest Date in Record is a field derived from a programmatic review of all available fields within a given record to estimate the earliest date by which the trademark can claim protection. Fields reviewed can include the Date Filed and First Use Dates for both U.S. and international protection. Please note that not all records with a status of MISASSIGNED will be included, as many of these records do not contain dates. This field is designed to be a helpful reference tool; further research may be required to determine the mark’s priority rights.

Analyst Information

Name:

Comments: **These queries, listed below, retrieved 383 potential references from the database. After careful review and analysis, I have selected 99 records for your review.**

Updating of the US State Trademark Database is provided by license with and permission of CT Corsearch.

Not Renewed: A state trademark record receives a status of "Not Renewed" when the deadline to renew the trademark has passed and the applicable state trademark office has not sent a notice of renewal.

+ Indicates that our trademark database for this state contains images, packaging samples and specimens of use filed with trademark applications.

* Because of the manual nature of data collection for Puerto Rico, we are unable to guarantee that all records through the coverage date are included.

ANALYST REVIEW – INTERNET DOMAIN NAME REPORT

Search Information

Type of Search: **Tailored Services**
 Mark: **SAMPLE INDUSTRIES**
 Goods/Services: **BUSINESS CONSULTING SERVICES**

Important Notices

Due to the constantly changing nature of the Internet, and the reasons detailed below, it is possible that the status of domain names may change between the time this report is generated and the time you receive this report. Therefore, we strongly recommend that you conduct additional domain name searching before attempting to register a domain name or forming a final opinion on the availability of a trademark or domain name.

- * The dynamic nature of the Web allows for the registration of new domain names virtually continuously, 24 hours a day.
- * All steps are taken to ensure the completeness and accuracy of our database. However, due to registrar/registry administrative procedures during domain name registration, some domain names may not be present in our database.
- * Domain name registrars do not report domain names which are not currently registered, nor do they report domain names which may be "on hold" with the registrar.
- * All domain names cited in this report should be considered to be REGISTERED as of the time this report was generated.
- * For common names, retrieval may be limited to the identical spelling of the name as ordered.

Due to the nature of the Web, and because we do not filter Web content, it is possible that the Web Page Lookups included in this report may contain objectionable material. If you wish to avoid the possibility of receiving such material, please contact us to "opt out" of Web Page Lookups.

Data Information

This report is the result of a computerized search of our database of top-level domain names. Our database is regularly updated with domain name data from all ICANN-accredited registrars and covers the following suffixes:

- .aero – air transport industry
- .biz – business
- .cat – Catalan language/culture
- .com – commercial
- .coop – for cooperatives
- *.edu – educational institution
- ** .gov – U.S. Government agency
- .info – information
- .mobi – content designed for mobile devices
- .name – for individuals and personalities
- .net – network
- .org – non-profit organization
- .pro – for credentialed professionals
- .travel – travel agents, airlines, hoteliers, tourism bureaus, etc.
- .us – country code for the United States

This report covers domain names updated to our database as of the following date: **JAN 14, 2011**

* The United States Department of Commerce no longer allows collection of the .edu domain names. Some records remain and may be cited from collections done prior to this restriction.

** The General Services Administration (GSA) no longer allows collection of the .gov domain names. Some records remain and may be cited from collections done prior to this restriction.
